REMODELING BALLOONS *A COMPLETE RANGE OF COMPLIANT OCCLUSION BALLOONS*

L'INNOVATION SUR MESURE*

REMODELING BALLOONS

A COMPLETE RANGE OF COMPLIANT OCCLUSION BALLOONS

BALT designed a complete range of compliant occlusion balloons to fit to any aneurysm either sidewall, terminal or bifurcation aneurysm during remodeling techniques. Our range consists in 3 types of occlusion balloons: **COPERNIC**, **ECLIPSE** and **BALTACCIB1/B2**. The HYDROSPEED2 coating, which covers also the balloons, allows to get an easy access while catheters design offers a superior stability during inflation and deflation of the balloon.

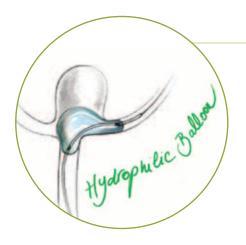

COPERNIC (FOR CAROTID SYPHON REMODELING)

- Perfect occlusion of wide neck aneurysms with a low pressure compliant balloon
- Easy navigation thanks to HYDROSPEED coating on the balloon
- Rapid balloon deflation, even with 2/3 contrast 1/3 saline mixture
- Superior stability and excellent push and torque given by the catheter design and the use of a .012" microguidewire
- E-marked also for **angioplasty of vasospasms**
- DMSO compatibility
- High visibility with 2 radiopaque markers at both tips of the balloon

REFERENCE	CATHETER LENGTH (CM)	BALLOON Length (MM)	BALLOON DIAMETER (MM)	VOLUME Maximum (ML)	GUIDEWIRE
SCOPERNIC10	160	10	3 to 5	0,30	
SOOI LINIOTO	100	10	5 10 5	0,50	Compatible with .012" guidewire (packaging includes a HYBRID1214D guidewire)
SCOPERNIC15	160	15	3 to 5	0,35	
SCOPERNIC20	160	20	3 to 5	0,40	
SCOPERNIC30	160	30	3 to 5	0,50	

ECLIPSE (FOR DISTAL AND BIFURCATION REMODELING)

- Perfect occlusion of bifurcation and terminal aneurysms thanks to its hyper compliant balloon
- Easy navigation thanks to HYDROSPEED coating on the balloon
- Superior stability and excellent push and torque given by the catheter design and the use of a .012" microguidewire
- Rapid balloon deflation, even with 2/3 contrast 1/3 saline mixture
- CE-marked also for **angioplasty of vasospasms**
- DMSO compatibility
- Widest range on the market in terms of length and diameters
- 1 cm nose-shaped tip distal to the balloon for extra stability
- High visibility with 3 radiopaque markers: 2 at both tips of the balloon and one on the extra 1 cm nose

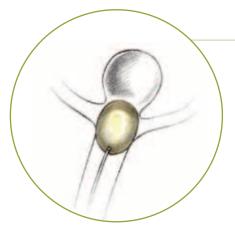

REFERENCE	CATHETER LENGTH (CM)	BALLOON Length (MM)	BALLOON DIAMETER (MM)	VOLUME Maximum (ML)	GUIDEWIRE
SECLIPSE7	160	7	4 to 6	0,20	Compatible with .012" guidewire (packaging includes a HYBRID1214D guidewire)
SECLIPSE9	160	9	4 to 6	0,25	
SECLIPSE12	160	12	4 to 6	0,30	
SECLIPSE15	160	15	4 to 6	0,40	
SECLIPSE20	160	20	4 to 6	0,50	

SECLIPSE

Both COPERNIC and ECLIPSE are compatible with our 300 cm .010" guidewire for exchange manœuvre: Reference HYBRID10D300

REMODELING BALLOONS

A COMPLETE RANGE OF COMPLIANT OCCLUSION BALLOONS

BALTACCIB1/B2 (FOR BIFURCATION REMODELING)

- Perfect occlusion of basilar or middle cerebral arteries' bifurcation aneurysms with compliant latex balloon
- Very easy navigation thanks to a flow-dependant catheter
 Superior stability when inflating or deflating the balloon
- Enhanced security since no guidewire is required
- DMSO compatibility

BALTACCIBI/B2

REFERENCE	CATHETER Length (CM)	BALLOON Length (MM)	BALLOON Diameter (MM)	VOLUME Maximum (ML)	GUIDEWIRE
BALTACCIB1	165	6 to 9	4 to 6	0,20	Maximum compatible
BALTACCIB2	165	12 to 18	4 to 6	0,50	guidewire: .009"
